

# SEDIMENT TRAPS AND WETLANDS

## Trap the Cr\*p

### ABOUT THE EVENT

Discuss the benefits of an effective wetland or sediment trap - What is the nutrient loss mitigation possible from a well-designed system? What does a well-designed system look like and what is the difference in design for solving Phosphorus/sediment vs Nitrogen issues?

Hear from farmers who have installed wetlands/sediment traps - What is the cost and effort involved? And what is their advice to others interested in developing their own system.

Discussions by experts will cover:

- Soil mapping and understanding
- Water and Contaminant pathways
- Pomahaka Water Care Group
- Catchment history, land use and catchment load.

### EVENT INFO

11.00-1.30pm | 25 February 2022

Tea, coffee and lunch provided.

#### LOCATION:

Russell Drummond  
180 Tiromaunga Road  
Castle Down
